## National Council of Acoustical Consultants

---

*"Enhancing the stature and effectiveness of the acoustical consulting profession for the mutual benefit of the public and the member firms."*

### NCAC DUES SCHEDULE

The NCAC dues formula is based upon an index number approach. The number of persons employed by your firm in support of the acoustical consulting function is translated into an index number by which annual dues are computed.

Persons who support the acoustical consulting function include firm principals, technical staff, and clerical staff. In the case of a multidisciplinary practice, include only those who are involved in the acoustical discipline.

In the case of part-time personnel, or personnel with split responsibilities, add up the total number of hours worked in acoustical consulting and round off to the nearest whole number. Add this number to the number of full-time personnel, compute your index number below and circle the appropriate index.

Index Number	Number of Employees	2025-26 Dues
1	1	\$255
2	2-4	\$510
3	5-9	\$765
4	10-16	\$1,020
5	17-25	\$1,275
6	26-36	\$1,530
7	37-49	\$1,785
8	50-64	\$2,040
9	65-81	\$2,295
10	82-100	\$2,550

Dues are \$255 per index number. Individual member dues (employees of member firms) are \$48.
